

Durabella Design A Deck Environmental Objectives and Commitments

For all projects including supply only and supply and installation Durabella Design A Deck aims to commit to the following objectives:

Prevention of pollution and reduction of carbon based emissions

Durabella Design A Deck use reputable hauliers to reduce our CO2 footprint & optimise transport requirements by co-ordinating deliveries. Where possible and practicable we limit the number of deliveries to reduce the carbon footprint.

Minimise use of energy, materials and utilities

We endeavour to use battery powered tools where possible.

We segregate materials and recycle. We source materials from reputable suppliers and emphasis procuring biodegradable materials where possible.

Minimise waste generation and promoting product reuse and recycling

Material requirements are calculated to minimise wastage. Excess materials are uplifted and key components are recycled. Where necessary, small quantities of waste may be disposed of using a responsible waste management company.

Substitution of hazardous and non recyclable materials

Durabella Design A Deck are committed to avoiding the use of hazardous and non recyclable materials, wherever possible.

Involvement of suppliers and other interested parties

Durabella Design A Deck liaise and work with our suppliers and hauliers to ensure that environmental initiatives are implemented.

Continual improvement of environmental awareness

Durabella Design A Deck communicates environmental awareness to employees through company communications and regular tool box talks.
